

Unlock Project Success with the ICA Global Commissioning Standard

The Industry's Most Comprehensive Commissioning Standard for Industrial Megaprojects

Why This Matters:

The ICA Global Commissioning Standard provides a structured, systems-based approach to commissioning, ensuring that projects stay on schedule, reduce risks, and achieve operational excellence. This best-in-class methodology ensures a seamless transition from construction to operations, minimizing costly delays and maximizing efficiency.

Key Benefits:

- Reduces costly delays & rework by embedding commissioning from day one.
- Standardizes commissioning roles & processes for clarity and efficiency. Technical System Support
- Minimizes risks & enhances safety through best-practice safety integration.
- Supports project managers & owners with structured methodologies.
- Improves handover & operational readiness for long-term success.

Who This Is For:

- Commissioning professionals
- Project managers
- Construction managers
- EPC contractors
- Vendors & project owners

What's Inside the ICA GCS?

- Phases & Milestones – A structured roadmap from FEED to Handover.
- Roles & Responsibilities – Clear accountability for every team member.
- Best Practices & Methodologies – Proven strategies for efficiency.
- Safety & Risk Management – Critical protocols for safe commissioning.
- Lessons Learned & Continuous Improvement – Ensure better outcomes every time.

How This Helps Your Project:

- Aligns commissioning with project objectives from day one. Project managers
- Ensures compliance with industry best practices and safety requirements. EPC contractors
- Reduces unexpected costs and risks by improving project coordination.
- Provides a repeatable, scalable framework for commissioning excellence.
